Inside WEDI: Exploring Workgroups (open to the health care industry)

1:00PM - 2:30PM

Before attending the workgroup meetings (May 19) and the conference (May 20-22) learn about WEDI's workgroups from each group's co-chairs. Learn about their work products, leadership, and common-sense approaches that enhance the exchange of clinical and administrative health care information.

HIPAA Exception Pilot Proves Significant Improvement: How Using FHIR APIs Streamlines Prior Authorization (recorded)

2:45pm – 3:30pm

After inquiries and feedback from membership, the HL7 Da Vinci Project requested and received approval in 2021 for an exception to HIPAA requirements for Da Vinci payers and their trading partners when using the FHIR standard for prior authorization, allowing members to test new versions of standards to prove out the ability of the HL7 FHIR® standard for Prior Authorization (PA) to improve efficiency and further achieve administrative simplification as envisioned by the HIPAA regulations. Through the exception testing, Da Vinci was able to demonstrate that the HL7 FHIR-based standards for PA significantly improved the prior authorization process in comparison to the existing standard. Presenters will share the lessons learned and significant outcomes of the testing, including how using FHIR APIs enabled the organizations to achieve an improvement of 140% or more in the time it took to complete individual point-to-point transactions.

- **Heidi Kriz, Director of Medical Policy and Medical Management, Regence**
- **Anna Taylor, Associate Vice President, Population Health & Value Based Care, MultiCare Connected Care**
